

STAY SAFE ONLINE

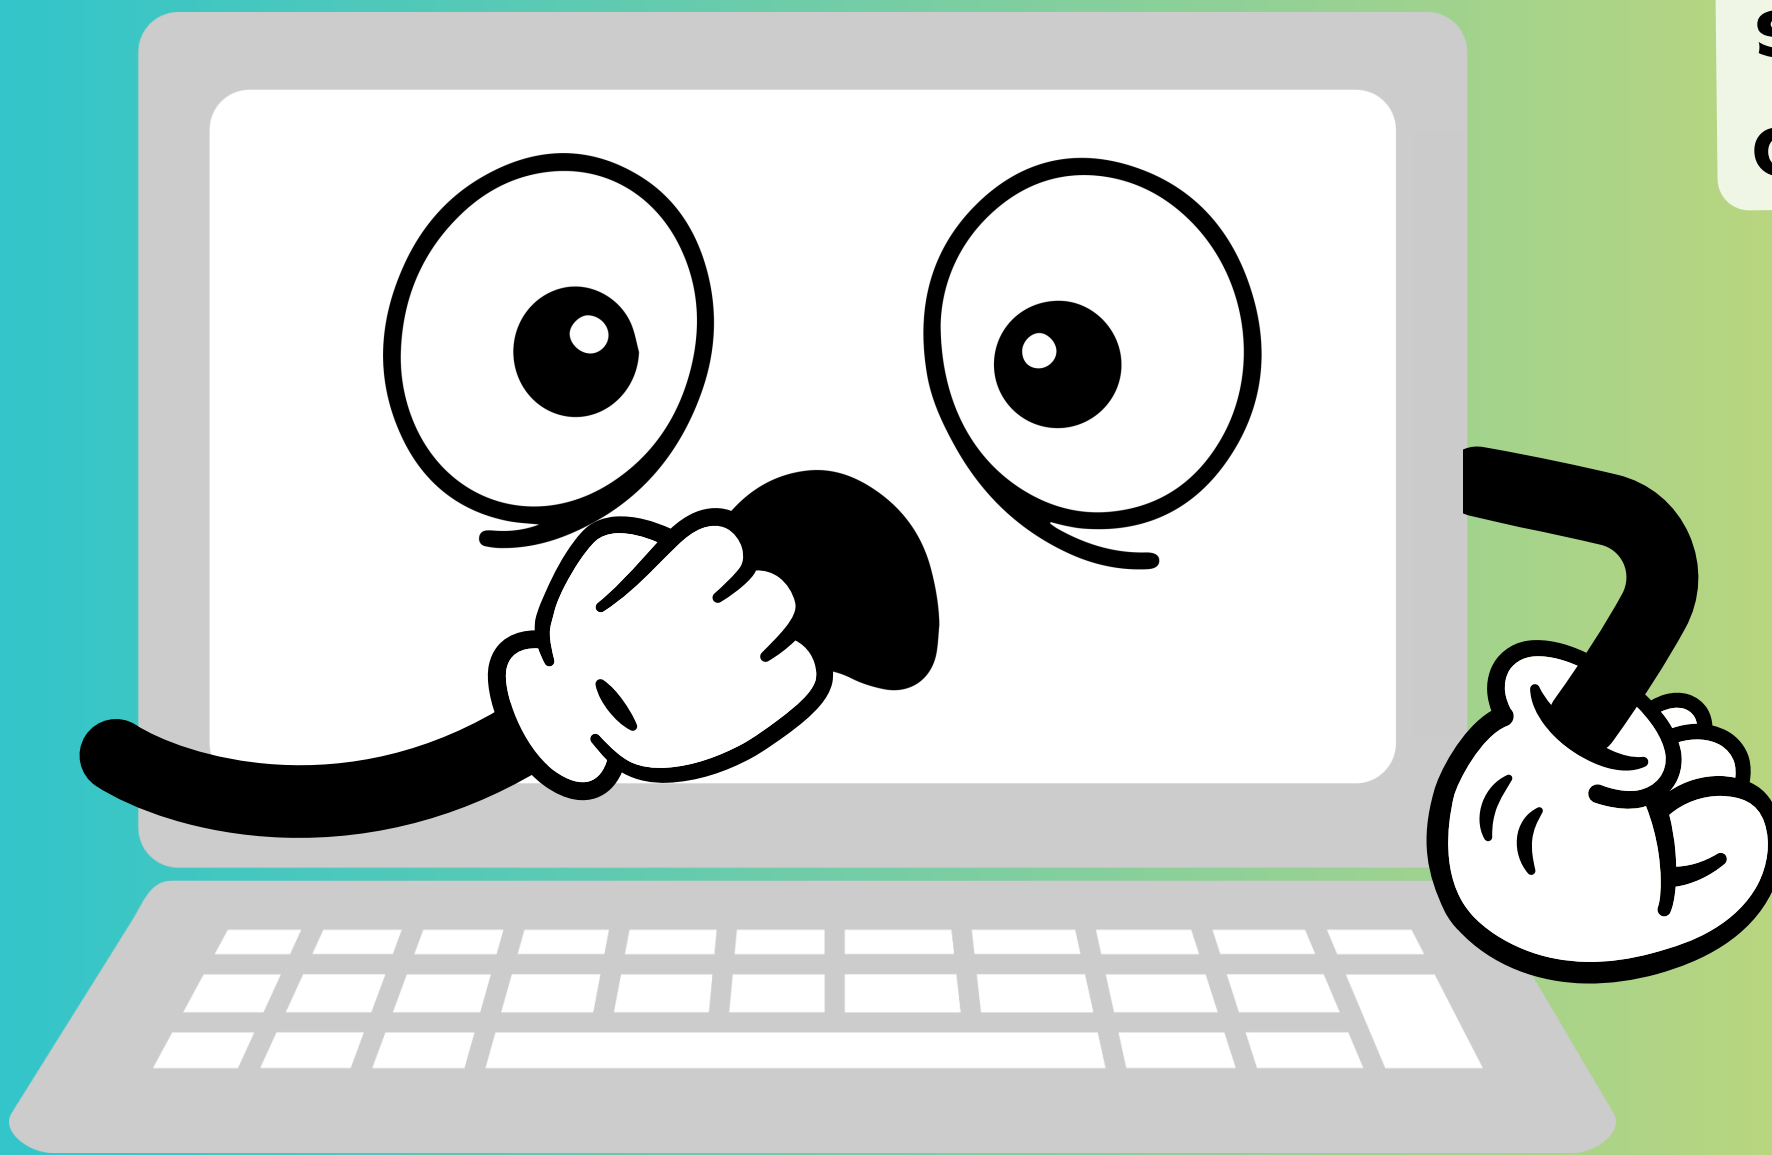

Protect Your Computer Like a Pro

Don't open shady emails, messages and web sites from randoms you don't know.

Don't click on sketchy links or download weird stuff.

If your computer starts acting sus, like too many pop-ups or moving slow as a snail, stay alert.

If your files get locked up and you can't even open them, let a trusted adult or teacher know.

Bad people can steal your information and pretend to be you!

Remember, it's always better to play it safe and ask for help if something's not right.
